

2N® IP Verso 2.0

The world's most modular intercom now with a Full HD camera

The second generation of the world's best-selling IP intercom boasts a wide-angle, Full HD camera and a new ARTPEC-7 processor that powers advanced features such as QR code reading. Enjoy unparalleled modularity, superb image quality and a wide variety of access methods.

Exceptional colour, unbeatable clarity

Sun shining behind the visitor? The new Full HD camera with the WDR-capable lens can deal with that. Low light? The 2N® IP Verso 2.0 maintains full image colour even minutes before total darkness.

Customisable to project's needs

Build the 2N® IP Verso 2.0 according to the customer's needs. It comes in either nickel or black finish, and allows you to combine 20 different modules to make up a truly unique intercom.

Three installation options

Choose the installation method that fits your project best. Install 2N® IP Verso 2.0 on the wall, flush mounted or on glass.

Mobile access & QR code reading

Besides the classic access methods PIN and RFID, the intercom also offers fast and reliable mobile access powered by WaveKey, and now QR codes, too! Great for one-off credentials.

Highly durable chassis

The new chassis, made of durable anodised aluminium, is super strong and will hold its shape perfectly during installation, even on uneven surfaces, without a single dent.

Minimal storage requirements

Axis' Zipstream technology reduces Full HD streams' bitrate and storage requirements by an average of 50% compared to H.264.
