V-2994-W Page Port PreAmp/Expander

The V-2994-W Page Port PreAmp/Expander is a solid-state preamp. The amplifier will accept a high impedance input (600 Ohms) and reduce it to a low impedance (8 Ohm) output.

The V-2994-W is capable of driving 150 Valcom one-way speaker/amplifier assemblies. Frequency Response: 80Hz-10kHz
