

V-BBSLD221W Backbox For VIP-LD221W LCD Display Speaker with Flashers

INTRODUCTION

The V-BBSLD221W Backbox is an optional accessory for the Valcom VIP-LD221W LCD Display Speaker with Flashers, designed to facilitate easy installation of the VIP-LD221W to hard surface walls. The V-BBSLD221W Backbox attaches to the VIP-LD221W Display Speaker base, providing an offset for conduit attachment to any of the four 7/8" knockouts (one per side).

The Backbox is constructed of durable, yet lightweight, 16-gauge aluminum, with a black powder coat finishing to match the VIP-LD221W.

MOUNTING

Surface mount the V-BBSLD221W backbox using hardware appropriate for the wall construction. Holes are provided in the back panel for attaching to a single-gang, double-gang or octagon electrical box. Additional holes are provided for typical wall studs on 16" center spacing. See Figure 1. It is recommended to attach the backbox to wall studs or similar structural members.

Attach the VIP-LD221W Base to the Backbox using the (8) #8-32x1/2" screws provided. With the Base mounted to the Backbox, make necessary wiring connections and attach the VIP-LD221W Display Speaker to the Base. See Figure 2.

TECHNICAL ASSISTANCE

Assistance in troubleshooting is available from the factory. Call (540) 563-2000 for Technical Support or visit our website at <https://www.valcom.com>.

Valcom equipment is not field repairable. Valcom, Inc. maintains service facilities in Roanoke, VA. Should repairs be necessary, attach a tag to the unit clearly stating company name, address, phone number, contact person, and the nature of the problem. Send the unit to:
