

Easy-to-Use PC Master Station Software with Intuitive Interface

*Convert your customer's
computer into a
feature-rich intercom!*

Whether the need is for the simple management of intercom solutions in small schools and offices, or for meeting the more complex demands of enterprise-level communication, the IX Series PC Master Station Software is your answer.

IX-SOFT PC Master Station Software

The compact USB dongle allows your customer to experience the simplicity of a desktop intercom.

ACTUAL SIZE

Reach **MORE** Customers with PC-Based Solution

Applicable for any customer type! This PC-based station is ideal for the common user in everyday situations, yet also perfect for the savvy guard overseeing an entire security operations center (SOC).

The software provides opportunities to revisit your existing IX Series installations too. Those who currently have an IX Series system can easily have their master stations replaced or added to locations where there isn't room for a physical master station.

Why offer your customers the IX Series PC Master Station Software?

From typical applications to complex configurations, the software offers the same features as the IX Series physical master stations.

ADDITIONAL BENEFITS

✓ Interactive map is a visual, efficient way of selecting stations

Staff can immediately detect where a call is originated and relay those details to first responders for them to accurately locate those in need of help

Drag-selection style makes it easy to group call, page, or monitor on the fly

General messages or paging alerts can be broadcast to a specific group or to the entire system, getting notifications to the masses

Color-coded call-in priority notifications allow personnel to quickly assess if a situation is a general inquiry or a potential threat

Layering maps provides the ability to zoom into specific areas for easier selection (campus, building, floor, etc)

✓ Reclaim valuable desk space

The PC Master Station Software eliminates the need of a physical master station, avoiding clutter where desk and counter space are a premium

The USB dongle is your customer's required key to continue accessing the software

✓ Device Check and Line Supervision ensure the system will operate as expected

Verifies all products are functioning properly and connected to the network, in which a notification is immediately sent if something is malfunctioning or offline

Operators will no longer have to perform a manual audit, a time-consuming process now done with the software

✓ Video conversations can easily be recorded

Recordings can be referred to at any time and transferred to other storage media (USB drives, SD cards, NAS systems, etc.)

In the event of a crime, recordings can be used to substantiate actual events

✓ Computer screen offers a larger viewing platform

The PC software can operate on any computer running Windows® 7 (64bit), Windows® 8.1 (32/64bit), or Windows® 10 (32/64bit)
