

Logitech® Tap Wall Mounts

Mounting the Logitech Tap or Tap IP meeting control panel on a wall provides easy access to launch and end video and/or audio conference meetings. In addition, wall mounts help prevent theft and misplaced units.

AVTEQ offers two wall mounting solutions that are compatible with the Logitech Tap and Tap IP meeting control panel:

- Tap IP In-wall mount (LTAP-WMP)
- Tap surface wall mount (LTAP-SM)

The in-wall box offers added security to the Logitech Tap IP meeting control panel and allows easy access for users in any room. In addition, the in-wall box allows all cabling to run through the walls, eliminating the need to find a power source or have cables running on tables and floors. The mount provides a flush-mounted installation for post or pre-construction.

The surface wall mount is installed directly on the wall or attached to a 1-gang or 2-gang wall box. Once the mount is installed, the Tap or Tap IP panel can easily be removed for tabletop access.

FEATURES
