Compact Ceiling Speaker Installation Instructions

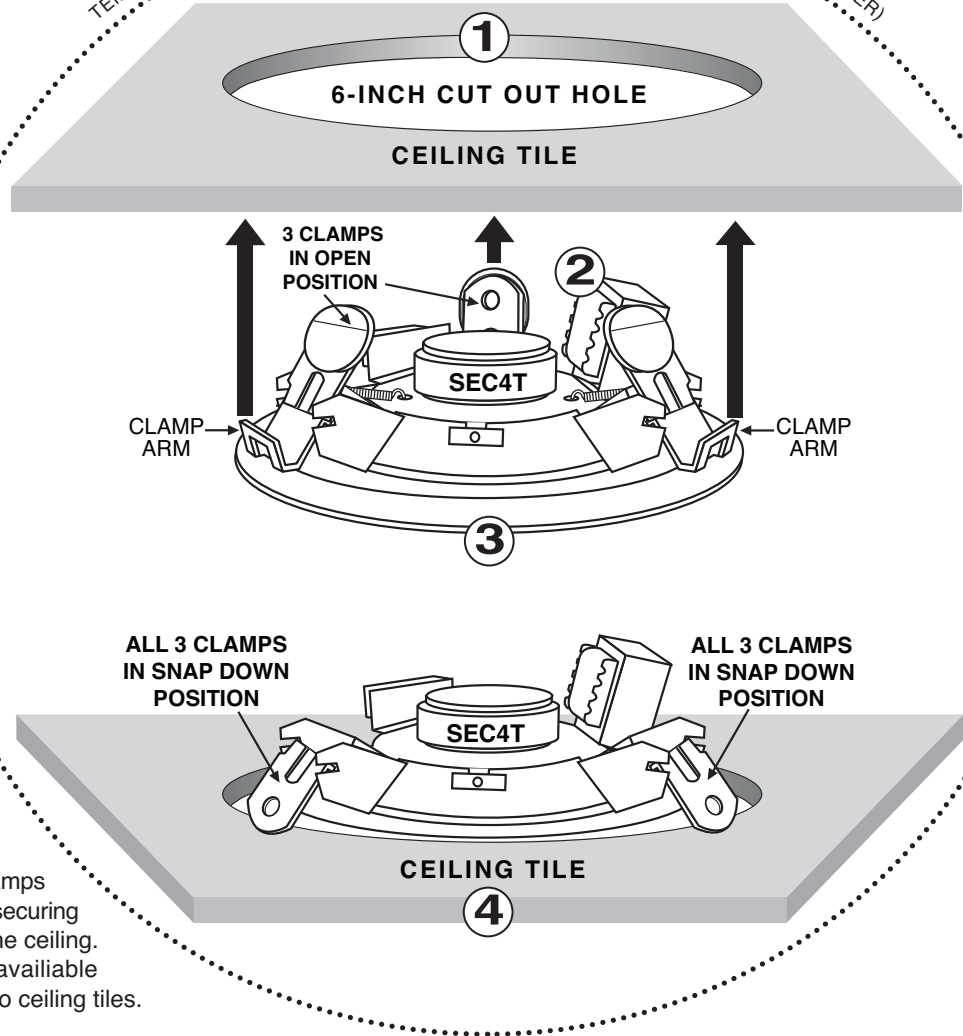

1. Cut a 6-inch diameter hole into the ceiling surface. Use template provided on this sheet to trace the hole size needed.
2. Connect Amp to the Speaker Tap and Black COM Lead (see the Tap diagram on the Magnet Label). Cut exposed wire ends off of all unused tap leads.

3. Retract the 3 Snap Clamps on the speaker into their fully open position. Then push the speaker up through the ceiling opening.

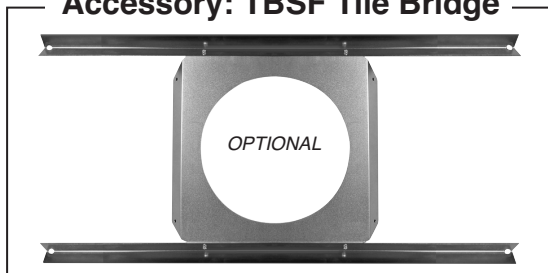

When Clamp Arms press against the ceiling, the Snap Clamps will rotate and clamp down closed to the ceiling surface.

4. When inserted correctly, all 3 Snap Clamps will be in the snap down position, thus securing the speaker securely into position in the ceiling. An optional Tile Bridge accessory is available (*sold separately*) for installs directly into ceiling tiles.

When using a tile bridge, make sure that the entire assembly has been centered on the ceiling tile to assure stability.
