1. Introduction

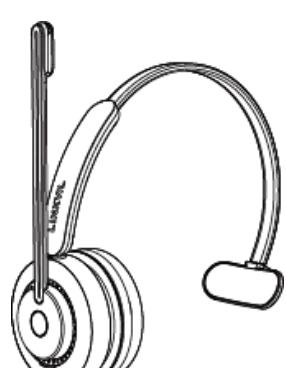

DH301D is a DECT wireless headset that goes beyond boundaries, enabling seamless communication in any scenario.

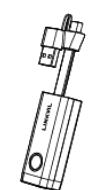

Features

- Dual-mode DECT & Bluetooth, switch flexibly between PC, phone, and IP phone
- Stable DECT connection with strong interference resistance, range up to 180m
- AI noise cancellation & voice enhancement, 270° rotatable mic
- 32mm speaker driver for clear, pure sound
- Lightweight, comfortable for all-day wear, switchable left/right ear
- Supports charging via USB-C or charging stand, plug-and-play with portable dongle
- Compatible with mainstream Softphone platforms and Fanvil V/X series IP Phones

4. How to Use

4.1. Wearing Instructions

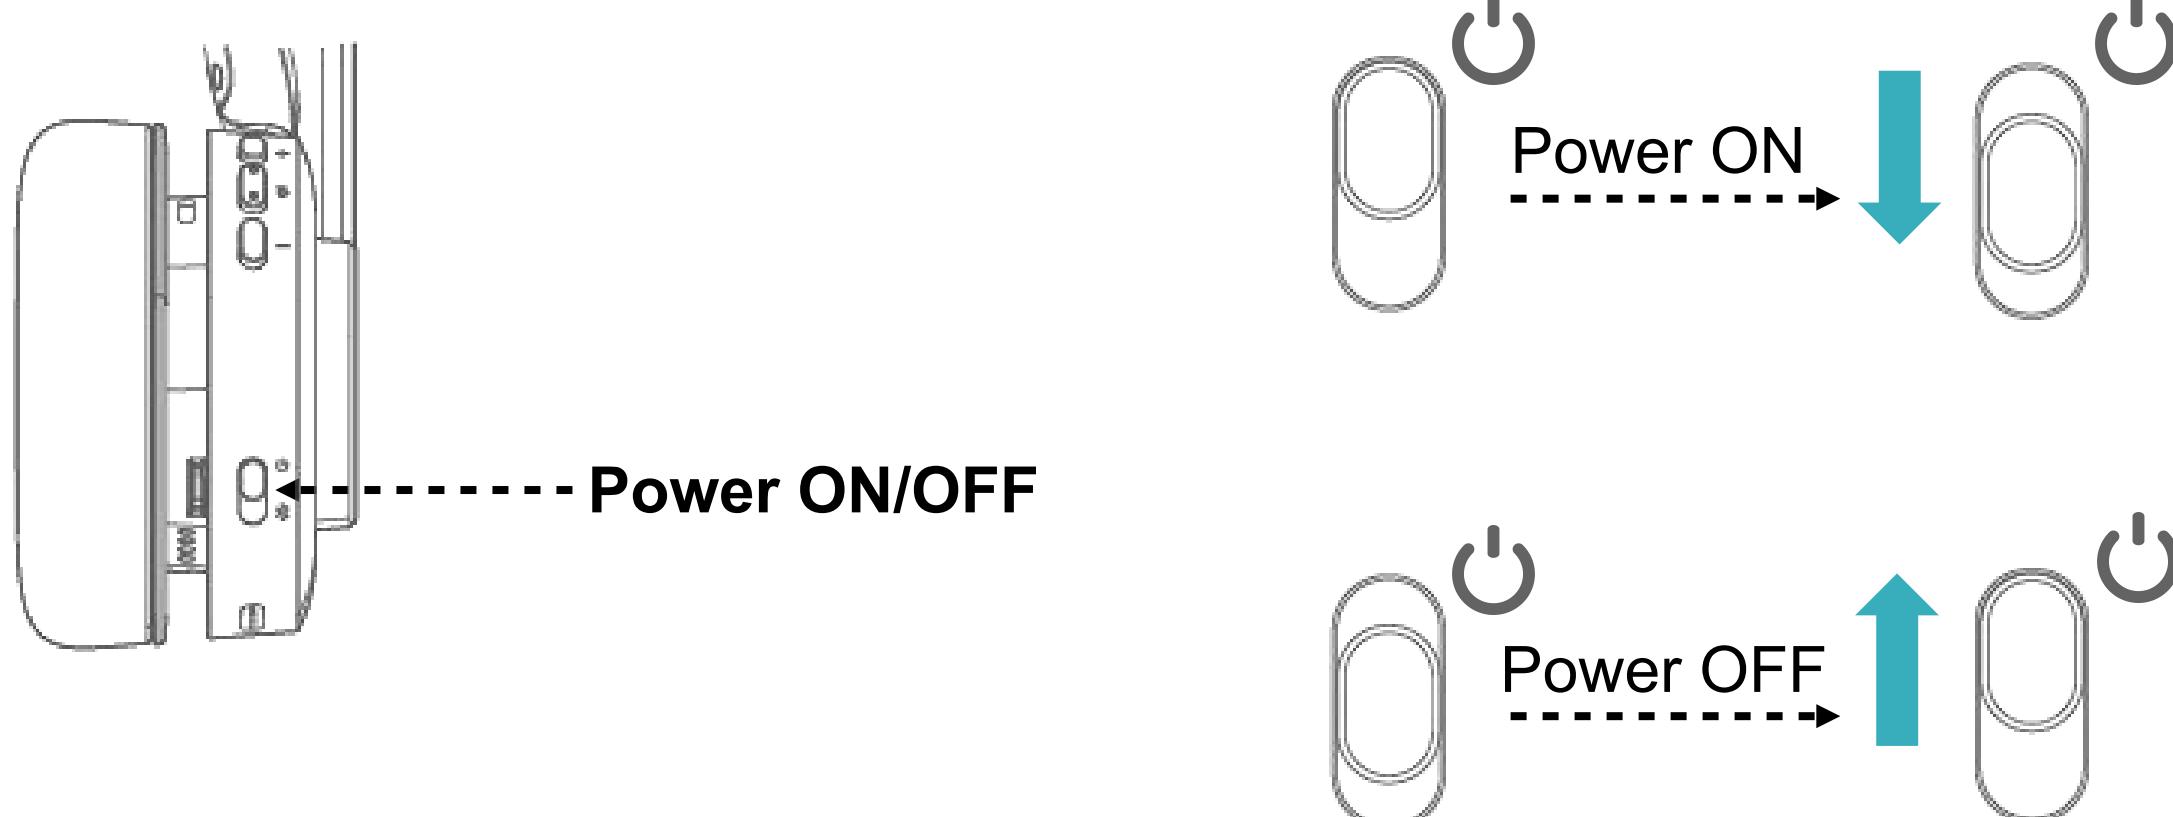

Adjust the headband to a comfortable angle and place the headset on your preferred ear (can be worn on either ear).

The T-bar should rest above the opposite ear to ensure a secure and comfortable fit. For optimal call quality, pull down the microphone and adjust it close to your mouth.

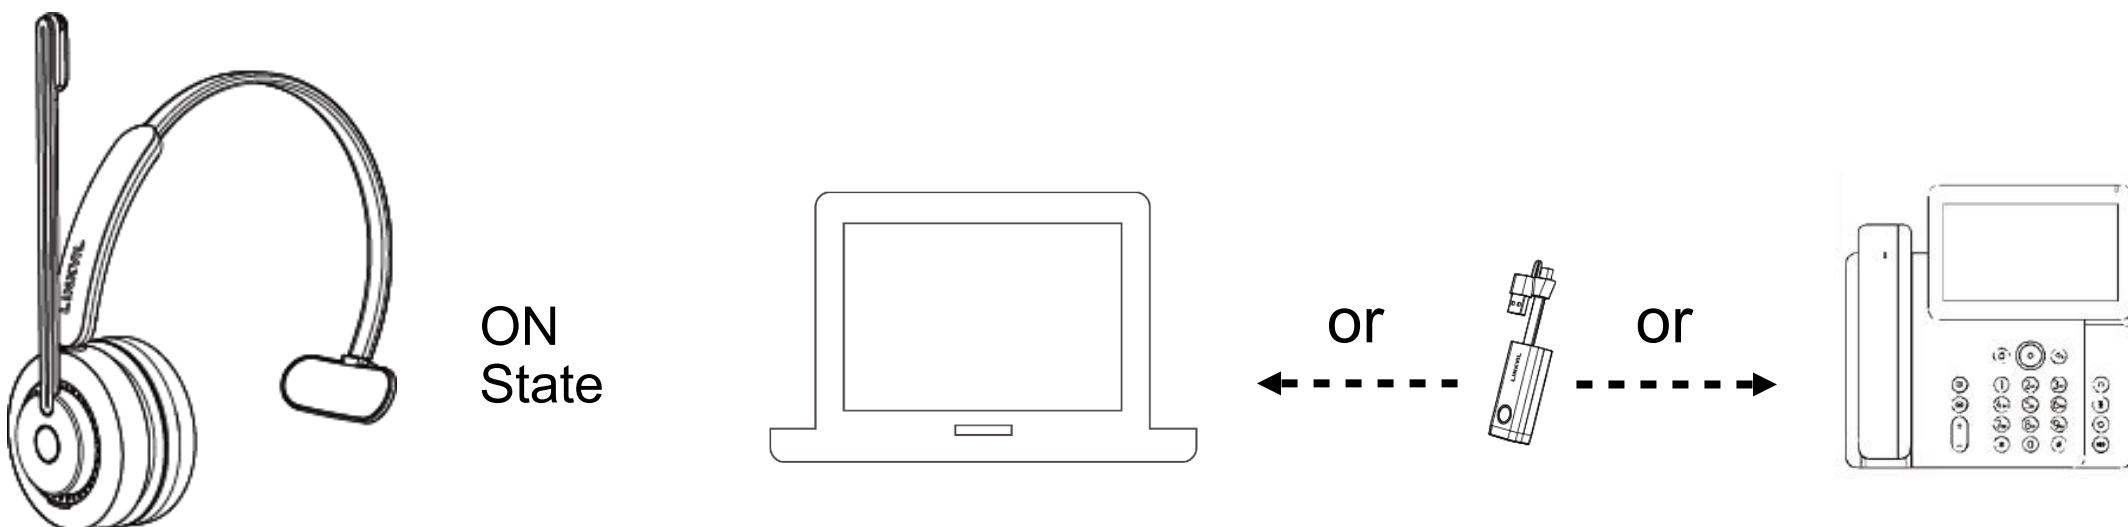

4.2. Power ON/OFF

Push the power button down to power ON the headset, and push the power button up to power OFF the headset. The Busylight will turn on accordingly.

4.3. DECT Mode Connection

Keep the headset power ON and insert DT10 Dongle into your device (PC or VoIP phone).

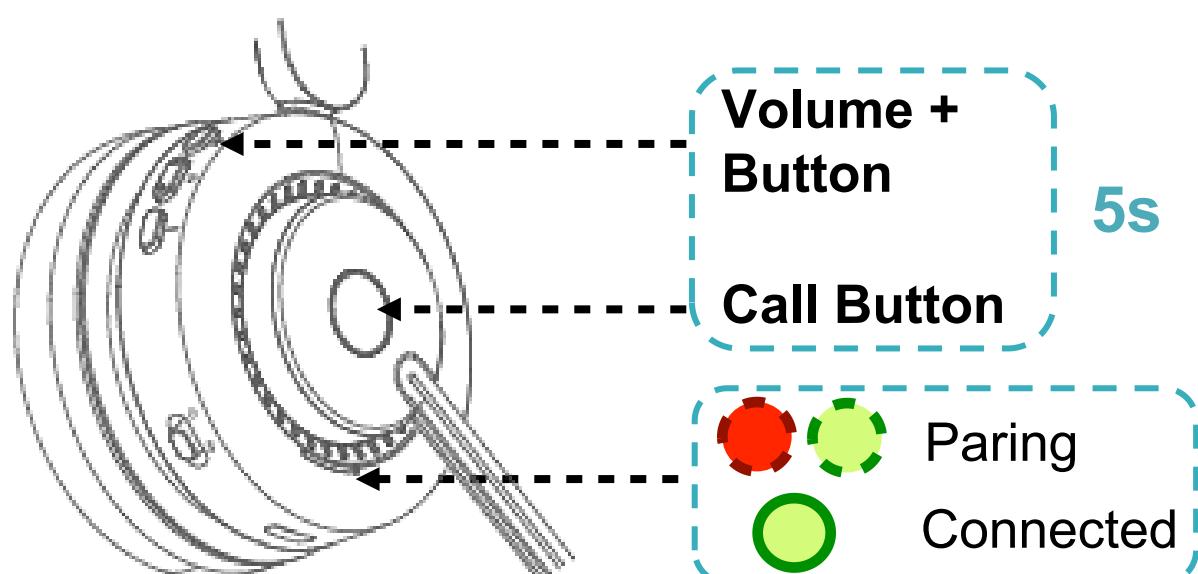

Notes:

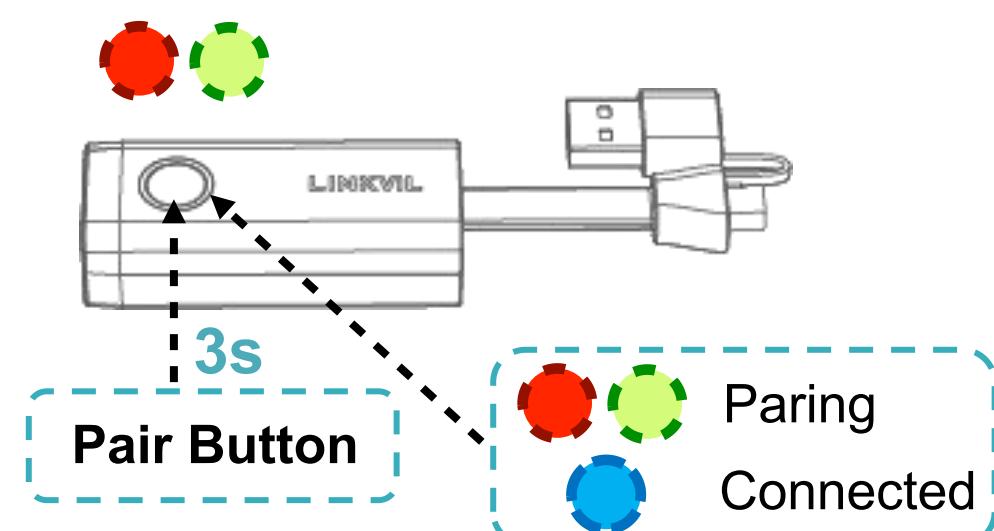

1. Your DT10 Dongle is pre-paired with your headset.
2. One DT10 Dongle can only pair with one device at a time.
3. If the DT10 Dongle is not paired or purchased separately, follow the pairing instructions.

4.4. DECT Mode Pairing

Simultaneously press and hold the call button and mute button for 5s.

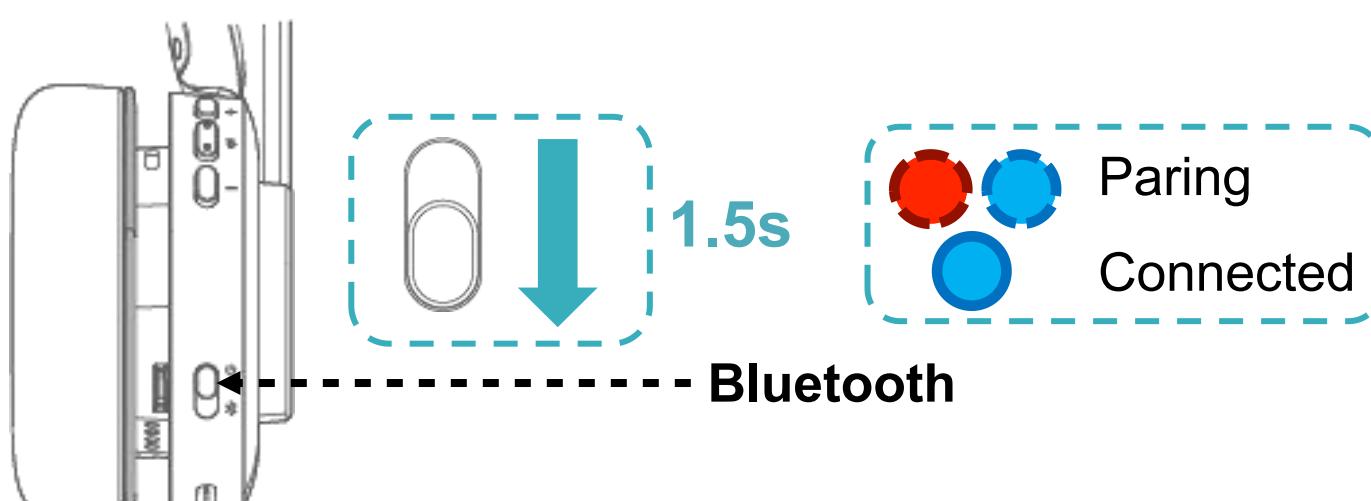

Insert DT10 into the device and hold the pair button for 3s.

Note: If the headset does not flash red and green after the above operation, it is running an earlier firmware version. In this case, please press and hold the Mute button and the Call button for 5s to enter DECT pairing mode.

4.5. Bluetooth Mode Pairing

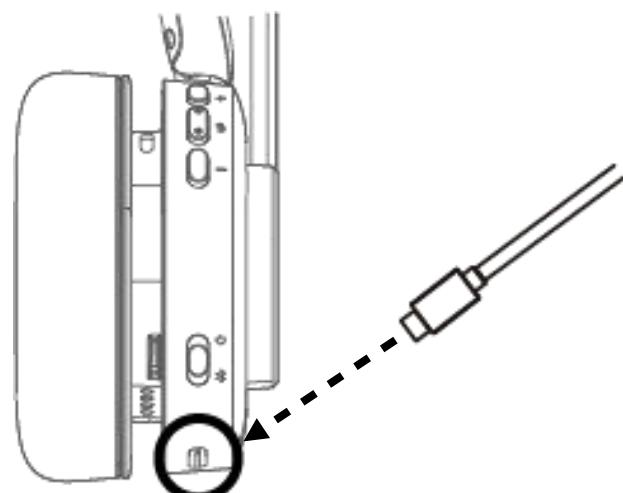

Press and hold the power button down completely for 1.5 seconds to activate pairing mode.

Note: Please release the button as soon as the red and blue lights begin flashing. Holding it for more than 5s will clear all Bluetooth pairing records, which may cause connection failures.

4.6. USB Mode Connection

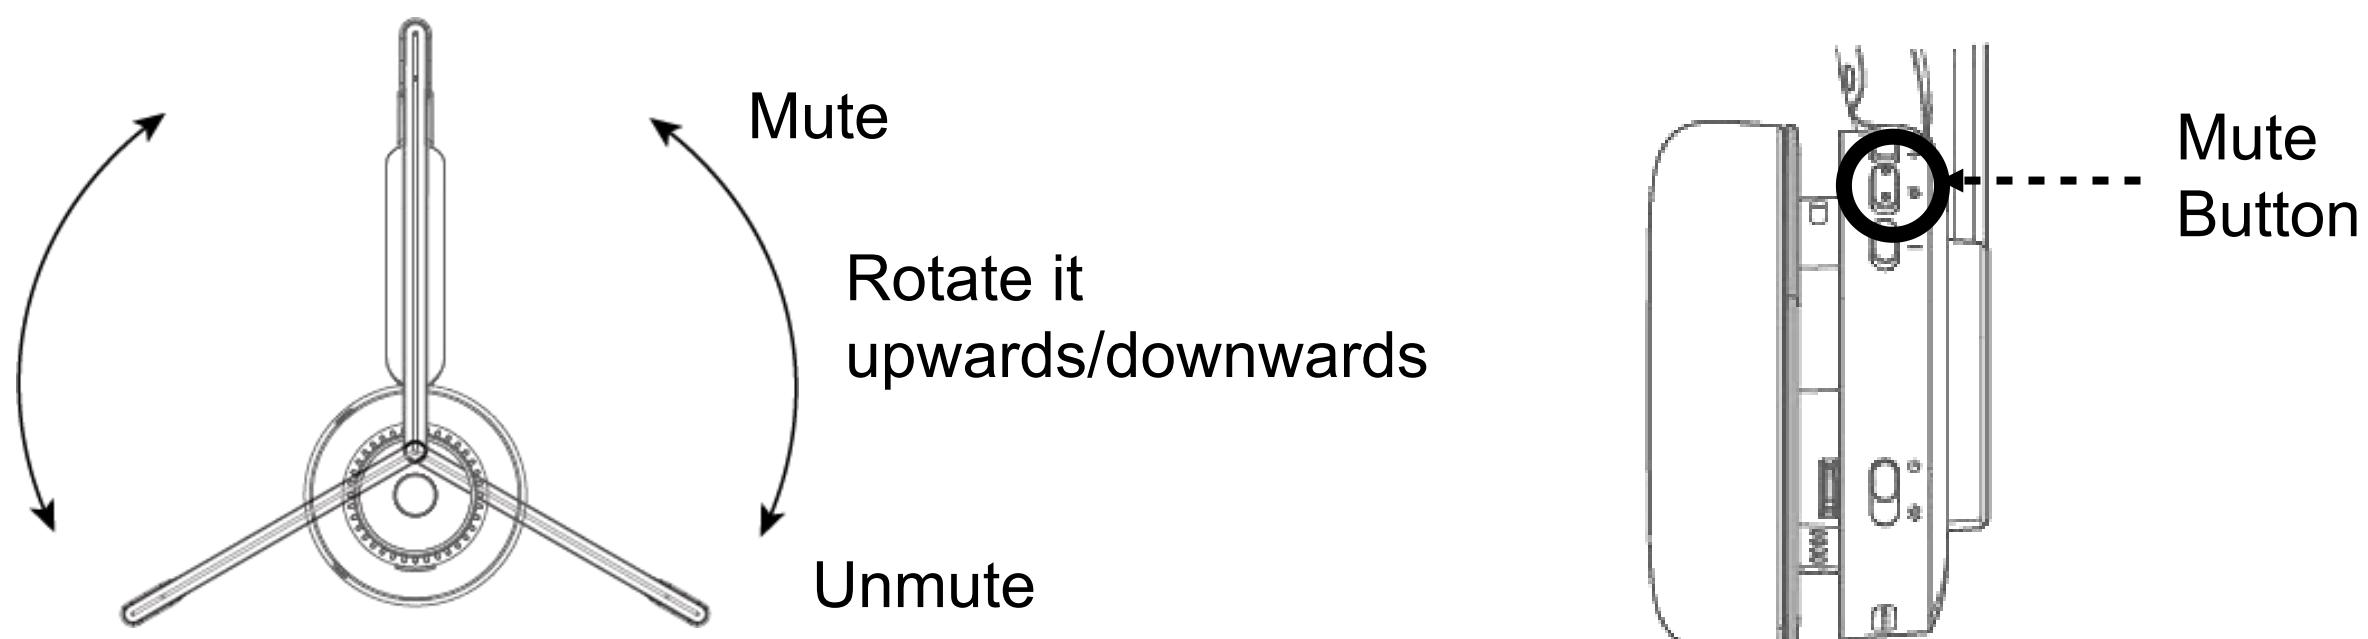

Connect the headset to your device via USB cable to enable simultaneous charging and audio calls.

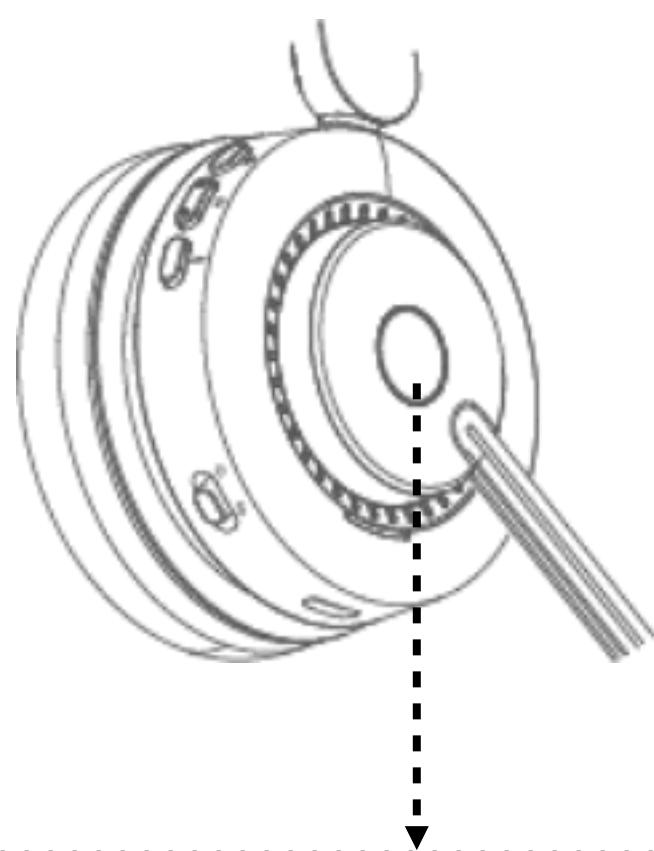

4.7. Mute Control

When the mic boom is in its initial position (vertical to the headband), the microphone is off. Rotate it down beyond $\pm 30^\circ$ to turn it on; when on, rotate it up beyond $\pm 30^\circ$ to turn it off.

Additionally, you can also mute or unmute the microphone by pressing the mute button once.

4.8. Call Button

Play / Pause

Press

Answer / Hang up

Press

Reject call

Double press

Hold / Unhold call

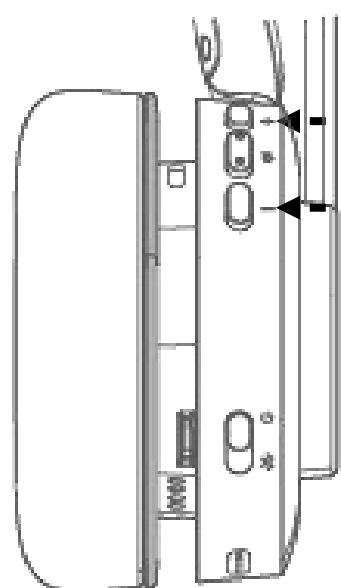

Press for 1.5s

Redial

Double press

4.9. Busylight Control

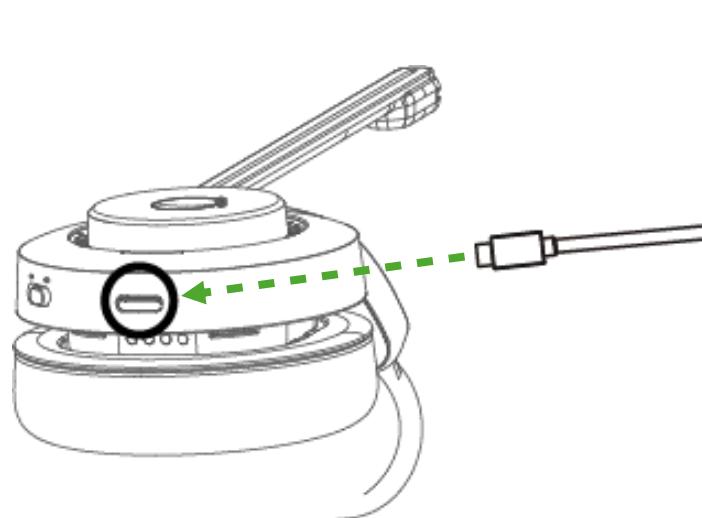

Simultaneously press and hold the Volume +/- buttons for 2s to turn on/off the Busylight.

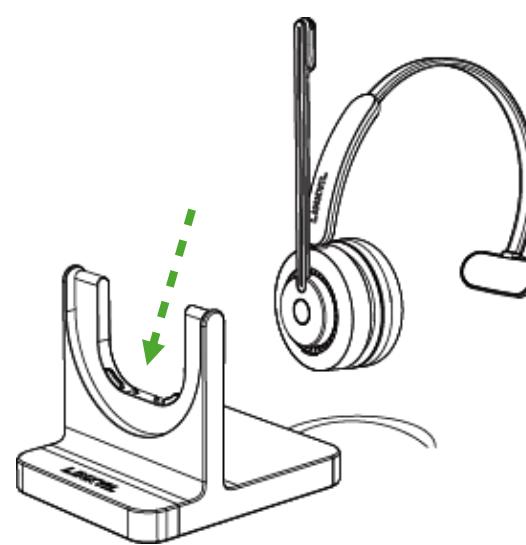

Note: When the busy light is turned off, no indicator will be shown during use. The function will return to its default (enabled) state after the headset is powered off and restarted.

5. How to Charge

Connect the USB cable to a charging adapter or computer to charge.
You can also charge the headset by using the charging stand.

USB Charging

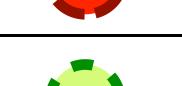

Charging Stand

Note: When the power of DH30 drops below 20%, there will be sound notifications.
Please charge DH30 as soon as possible.
