The Hikvision iDS-2CD7146G0-IZSx DeepinView Indoor Varifocal Network Dome Camera supports Darkfighter technology, which allows for viewing and recording in ultra-low light conditions.

With a WDR of 140dB and Lightfighter technology, the image quality is excellent regardless of the degree of lighting.

The camera features 2.8 to 12 mm or 8 to 32 mm motorized varifocal lenses, and offers an EXIR 2.0 IR range of up to 100 ft (30 m) or 165 ft (50 m).

In addition to the traditional Smart features, such as line crossing, intrusion, entrance/exit and unattended luggage detection, this product includes a host of deep-learning based functionalities.

These include face recognition, multi-target type detection (recognition of facial and body features), face counting, hard hat detection (recognition of whether a hard hat is being worn, for up to 30 individuals and four regions), queue management (counting of the number of people standing in line and displaying of the waiting time for each person), human and vehicle detection, and false alarm filtering.

The product can also collect and transmit metadata related to alarm instances, which can be used to develop or support third-party applications.
