

Dynamic™ BalanceBox mCart III

The Dynamic BalanceBox mCart III is a motorized height-adjustable mobile display cart designed to support large displays up to 98" and 140 kg (308 lb). Built for unified communications, video conferencing systems, and collaborative AV environments, the mCart III provides a professional mobile mounting solution for displays, cameras, soundbars, and AV accessories.

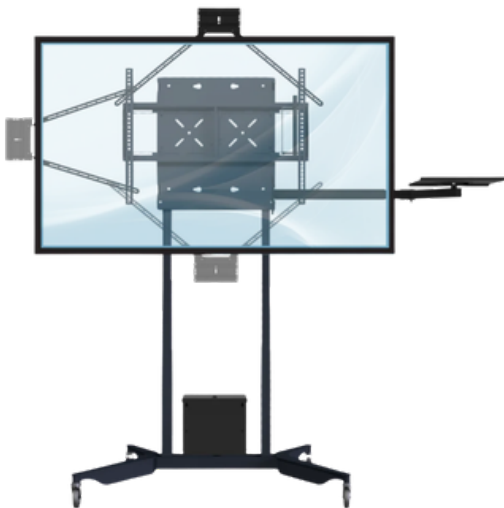

The mCart III mobile stand offers 650 mm (25.6 in) of motorized vertical height adjustment, allowing users to easily raise or lower the display using a wired remote control. This ensures optimal viewing height and ADA-accessible screen positioning, making it suitable for conference rooms, classrooms, training spaces, and corporate collaboration environments, including use by wheelchair users.

FEATURES

- Supports a single display up to 98" (16:9 Format) 105" (21:9 Format) with max weight of 308lbs
- Motorized double legs provide height adjustments up to 25.6 of travel
- VESA Mount included
- Dual Anti-collision system
- UL listed and CE (UL962 and UL62368)
